## Streamlined UI

The completely redesigned user interface in Articulate Quizmaker makes it even easier to create a quiz. With its streamlined workflow, you author quizzes in one window and quickly switch between questions using tabs.

Watch User Interface Video

Form View / Slide View

Two Development Modes

Choose from two different development modes: form view and slide view. With form view, you just fill out a form to create a quiz. Switch to slide view to design your slide any way you want.

Watch Development Modes Video

Characters

Add photographic and illustrated characters to your assessment right from the Quizmaker character library. Choose from up to 47,500 combinations of characters, expressions, and poses.

Watch Characters Video

Character | Expression | Pose | Get more characters...

Male 1   Male 2

Multimedia

Import videos in virtually any format, including those you make in Articulate Replay. You can also record video from your webcam, or easily embed it from websites such as YouTube. And with the video editor in Quizmaker, you can easily crop and trim your video, adjust the volume, or add a watermark or logo.

Audio

Add narration and sound to your assessments by importing audio, or simply record it right in Quizmaker. And with the built-in editor, you can easily edit audio files—just click and drag on a visual of the track.

Watch Audio Video
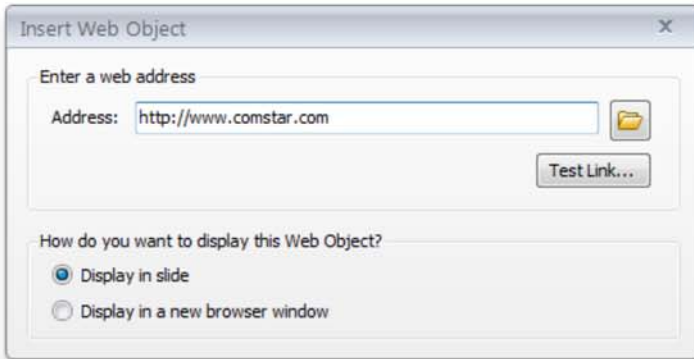

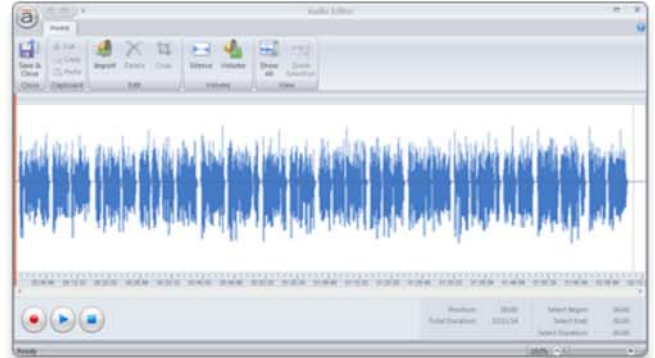

Web Objects

Easily embed visually rich web-based applications, games, videos, reference material, and other web content into your Quizmaker assessments.

Images and Objects

Insert or draw objects and images, then easily apply a wide range of effects, such as reflections, shadows, and glows. And once it's perfect, instantly apply the effects to other objects with the format painter.
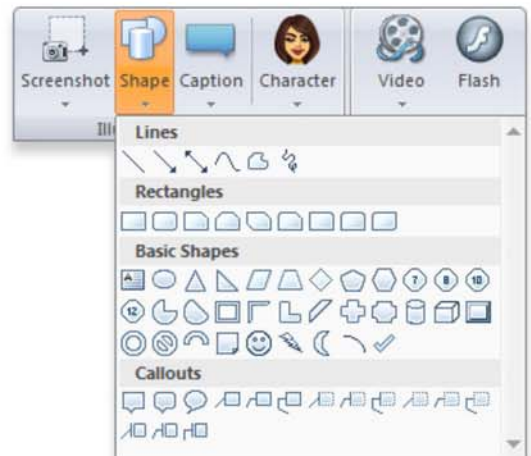

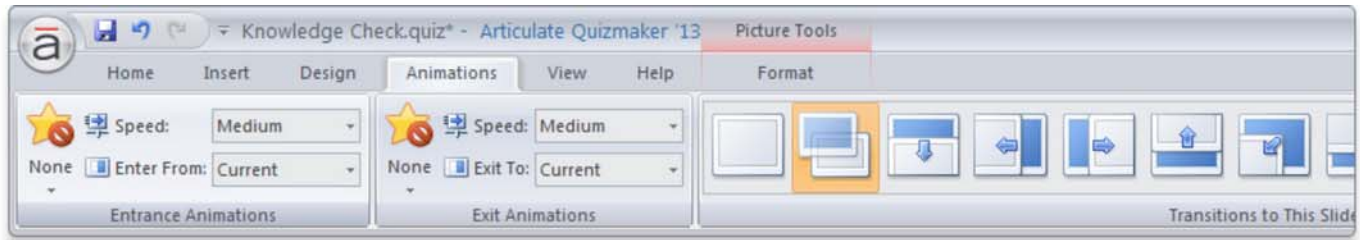

Animations and Transitions

Stylize your assessment with entrance and exit animations for images, shapes, characters, and even text. And apply transitions to make slides fade, dissolve, and more.

Watch Animations and Transitions Video

Timeline

It's simple to make sure objects, questions, and choices appear on your slide at the right time. You just drag items on the timeline to sequence them.
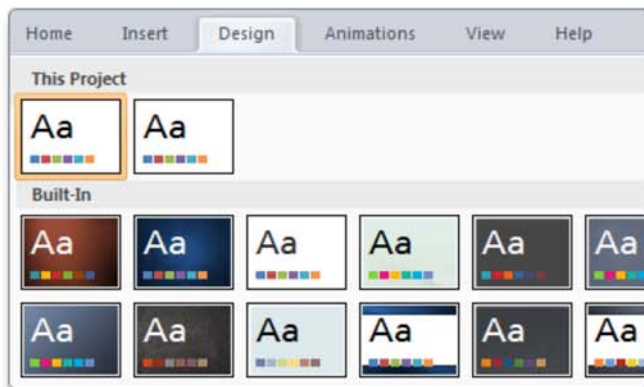

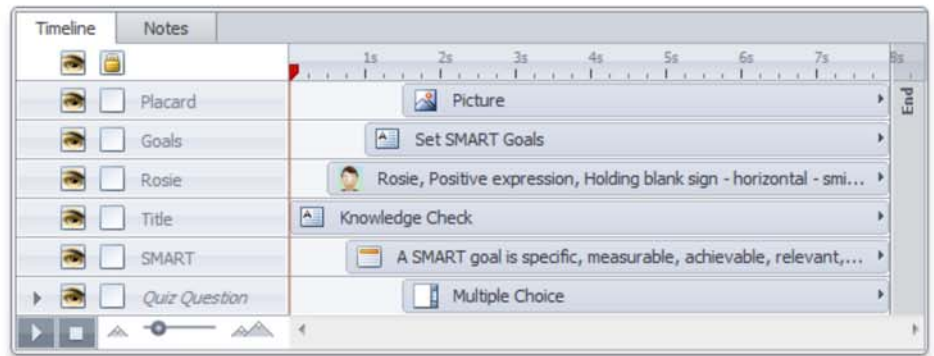

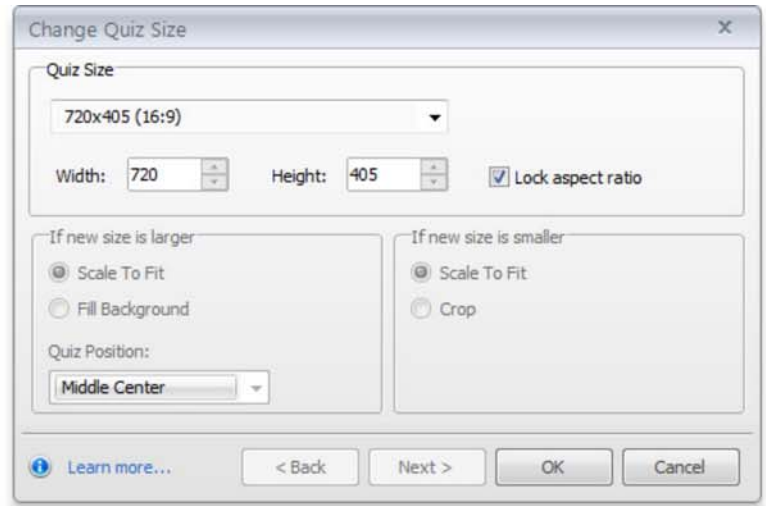

Themes

Create a compelling look for your assessments with a ready-made design theme—or build a theme of your own. Themes include coordinated color palettes and fonts that you can apply to a single question or an entire quiz.

Custom Slide Sizes

Go big or small, portrait or landscape. Your choice. Articulate Quizmaker '13 supports custom quiz sizes.

Change Quiz Size

Quiz Size

720x405 (16:9)

Width: 720   Height: 405   ☑ Lock aspect ratio

If new size is larger
- ◉ Scale To Fit
- ○ Fill Background

Quiz Position:
Middle Center

If new size is smaller
- ◉ Scale To Fit
- ○ Crop

Slide Masters

Save time by using slide masters to make design changes across multiple slides—all at once rather than one by one.
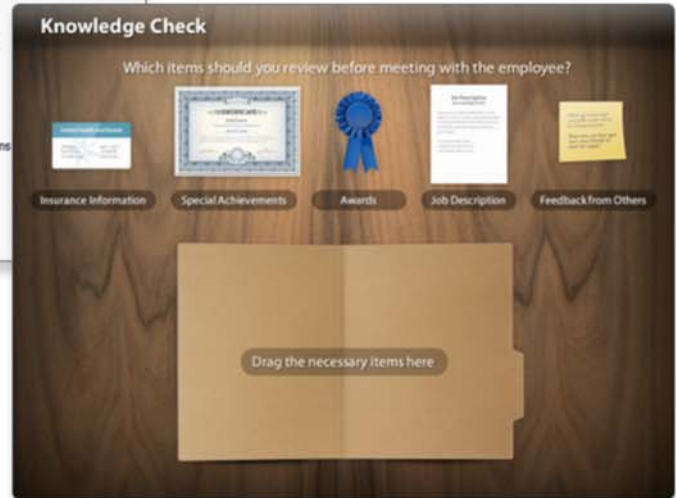

Assessments, any way you want.

It's a whole new world. It takes just minutes to create decision-making scenarios, drag-and-drop activities, quizzes, surveys, and more.

"LOVE the changes to Quizmaker!" — **Carla Kelley-Gonzales, EmployBridge**

Drag-and-Drop Questions

Create a drag-and-drop quiz question with any object in Quizmaker. Just add it to your slide, then use the form-based editor to assign drag items and drop targets.

Watch Drag-and-Drop Questions Video

Free-Form Questions

With the new free-form question types in Quizmaker, you can transform any object into an assessment. Just add objects to a slide in slide view, then use form view to quickly convert them into a pick-one or pick-many interaction.

Watch Free-Form Questions Video

25 Question Types

Rapidly create 25 different types of questions using the simplified form-based editor.
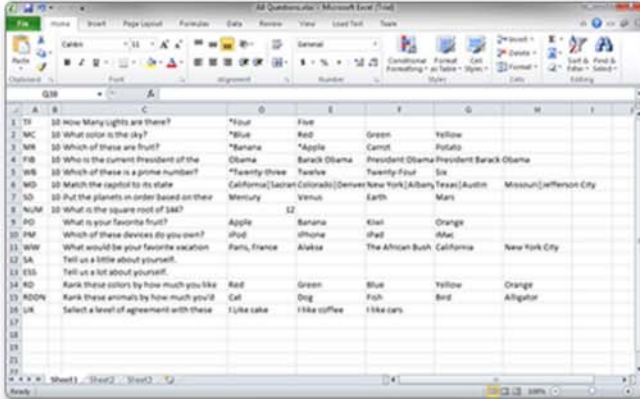

Watch 25 Question Types Video

Question Import

You don't have to start every assessment from scratch. You can use questions from a database or from your subject matter experts to build assessments. Just import them from an Excel or text file.

Watch Question Import Video

Question Pooling and Randomization

It's simple to build groups of questions and import questions from other Quizmaker quizzes. And you can customize how questions are randomized when pulled from these pools.

Watch Question Pooling and Randomization Video
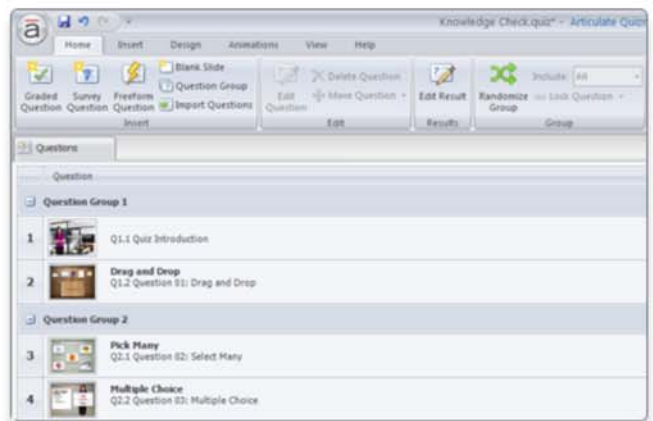

Branching

Focus learners on the content they need the most. Take them to different slides depending on how they respond to real-life scenarios, remedial questions, and other assessments.

Watch Branching Video

Customizable Feedback Layers

Use default feedback layers or customize them any way you want. You can add characters, images, or even multimedia—it's up to you.

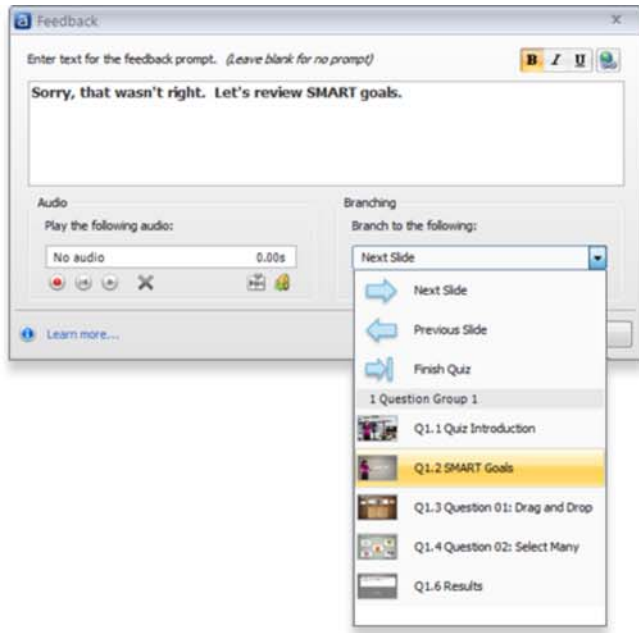

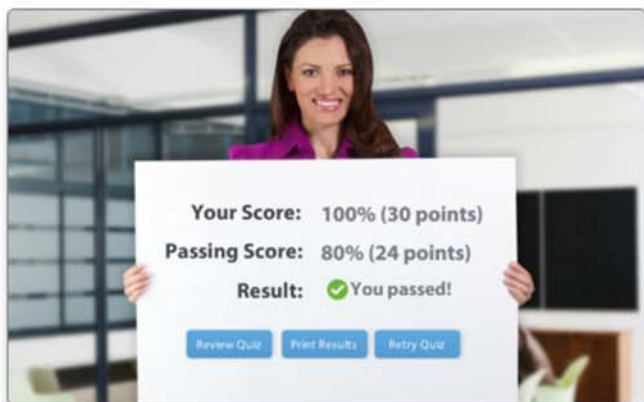

Watch Customizable Feedback Video

Customizable Results

Quizmaker makes it easy to customize results slides. In slide view, design the look of your results slide. Then in form view, choose options such as show learner score, show passing score, allow user to review quiz, and more.

Watch Customizable Results Video

Customized, unified.

Create a better online learning environment with intuitive navigation, polished player customizations, and one set of controls.

"The simplified and uniform player gives you greater control over the color, look, and feel of your content. Try it; you'll like it!" — **Michael Fimian, Owner, Instructional Tech**

Unified Player

All Articulate Studio '13 products share a unified player. So if you add a Quizmaker assessment to your Articulate Presenter '13 course, learners can easily navigate using a single set of controls.

Watch Unified Player Video
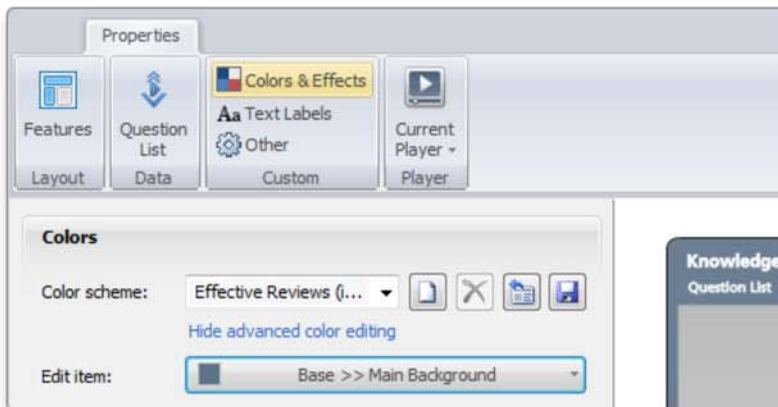

Customizable Player

Frame your assessment perfectly with a customized player. Use a polished color scheme or create a custom look to match slide content or your brand guidelines. You also have control over player layouts, text labels and language, player controls, and more.

Customizable Navigation

Control how learners navigate your assessment. Let them submit one question at a time or all at once. And if they stop mid-assessment, you can even have them resume where they left off.

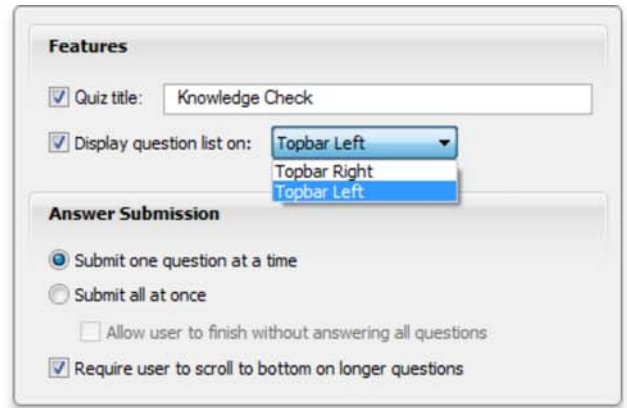

Watch Customizable Navigation Video

Features

☑ Quiz title: Knowledge Check

☑ Display question list on: Topbar Left ▼
                              Topbar Right
                              Topbar Left

Answer Submission

⦿ Submit one question at a time

◯ Submit all at once

   ☐ Allow user to finish without answering all questions

☑ Require user to scroll to bottom on longer questions

Reach more learners.

Create your quiz once, then easily publish it for learners everywhere with just a few clicks.

"Quizmaker '13 is just amazing! All these features and still so easy to use—creating high-end content was never easier."
— *Jeff Kortenbosch, Rapid e-Learning Specialist, AkzoNobel | Serious Learning*

Flash

iOS
iPad
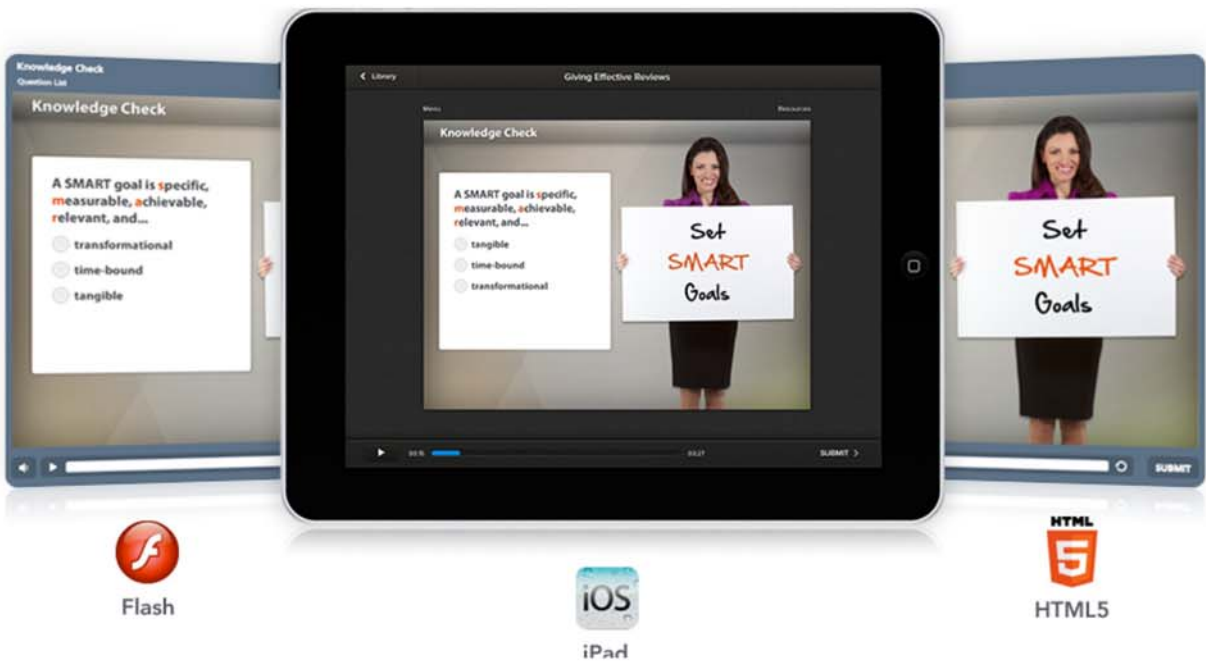

HTML5

Publish to Flash, HTML5, and Mobile

Let learners view content wherever they are. Just build your assessment, then publish it to multiple formats so learners can view it on their desktops, laptops, iPads, and more. Quizmaker publishes to HTML5, Flash, and the Articulate Mobile Player, a native app that optimizes content for iPads.

**Watch Publish to Flash, HTML5, and Mobile Video**

Publish Location

Select a presentation to publish into:

P   C:\Comstar\Effective Reviews.pptx

...
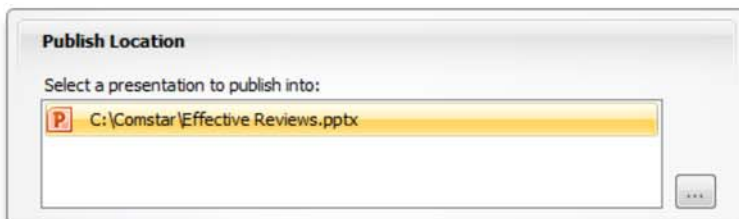

Publish to Presenter '13

Easily insert your assessment into a Presenter course with just a few clicks.

Publish to Word

Make it easy for subject matter experts and others to review your assessments by publishing them to Microsoft Word.

Section 508

Make your quizzes widely accessible with Quizmaker's industry-leading Section 508 support. Now learners with screen readers can easily access course assessments.

Tracking and Reporting

Quizmaker publishes Tin Can API-, SCORM-, and AICC-compliant content so it works seamlessly with learning management systems that support those standards. You can also publish to Articulate Online to cost-effectively track and report on assessment activity.

| User	Score

Right-to-Left Languages

Make it easy for learners around the globe to access your quizzes. Localize your assessments with Quizmaker's right-to-left language support. Quizmaker also supports double-byte character sets (DBCS), so you can even translate your quizzes into Chinese, Japanese, and Korean.

Translation Support

Easily translate your quizzes into any language to localize your content for learners anywhere. Quizmaker lets you export all quiz and player text to Microsoft Word or XML format. After you've translated the text, simply import it back in. Quizmaker preserves all of your formatting.
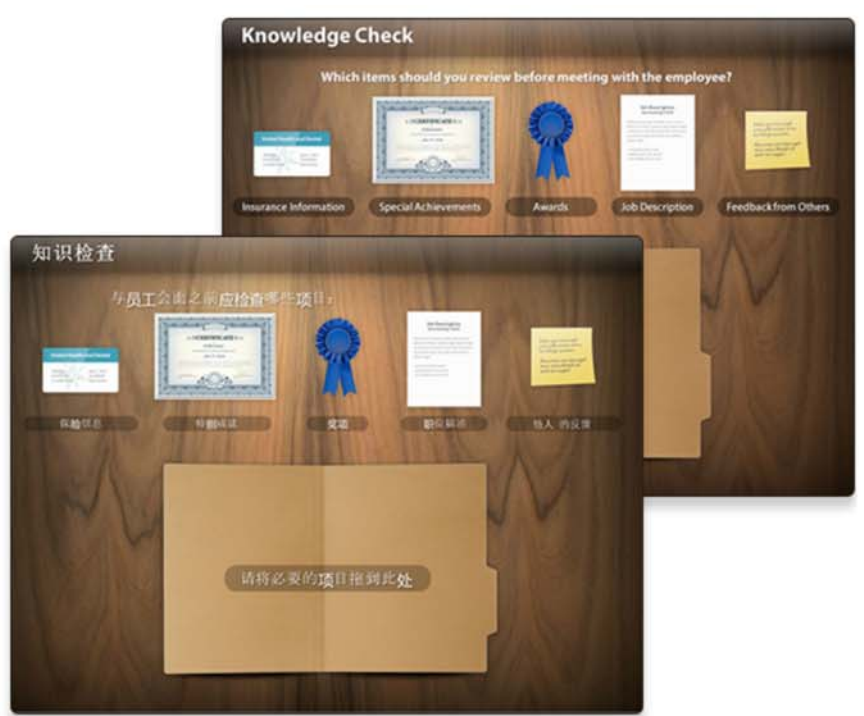

Extend Articulate Studio.

Share what you know. Learn from others. Add more content. It's all just a click away.

"I am so impressed by the extensive information and product support available through this community and by the helpfulness of its contributors." — **Michael Coady, President, eLearning Design Canada**

Articulate Community

Get even more from Articulate Studio products by joining the industry's largest, most active community: E-Learning Heroes (http://community.articulate.com). Curated by widely recognized leaders in e-learning, E-Learning Heroes gives you access to ready-to-use, beautifully designed templates—for free. Watch tutorials and get practical tips, free downloads, expert advice, and more. Join user discussion groups to learn about best practices, shortcuts, and tips for building the ultimate e-learning course.

Template Sharing

Save your Studio project as a template, then share it with the Articulate community. Or, email the template to team members, helping standardize course design across your organization.

Character Packs

Build your Studio character library with additional photographic character packs featuring a range of ethnicities, ages, and clothing. You can use each additional pack you buy with both your Studio and Storyline products. Each photographic character pack includes standing poses, headshots, and torso crops, so you can quickly find the right look.
